## *Preface*

The Students' Satisfaction Index (SSI) is a quantified feedback of students on the course.

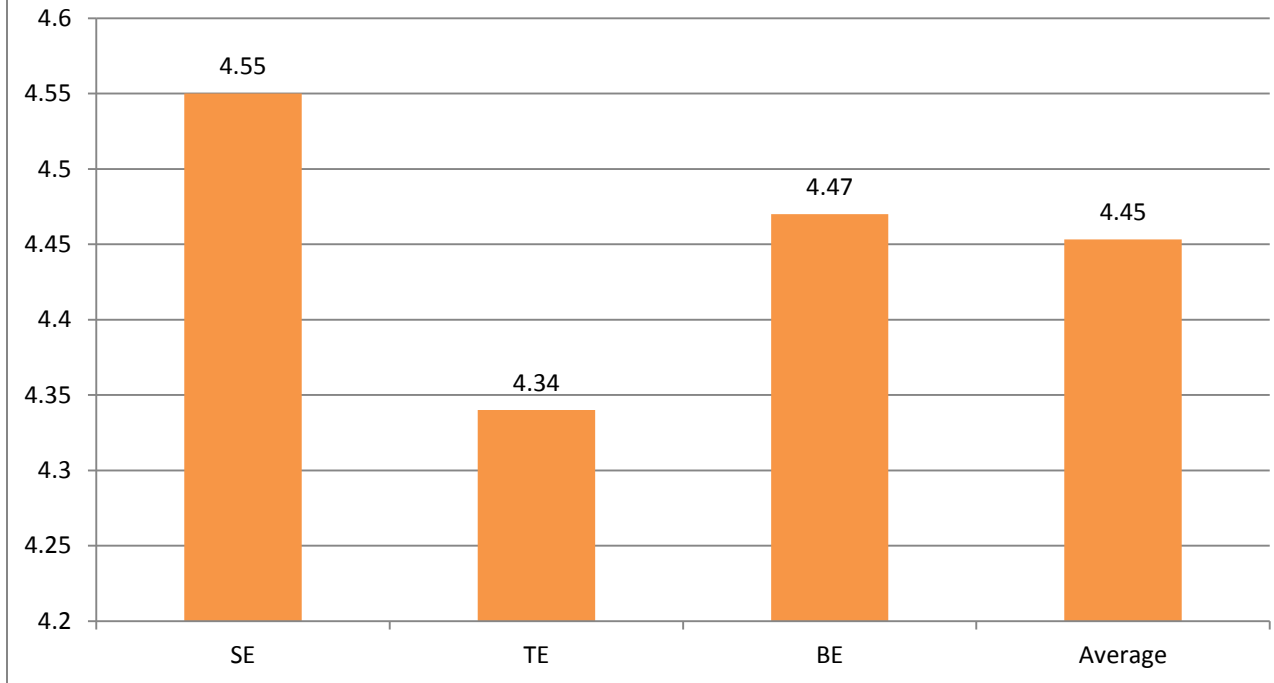

Every student was asked feedback on the sections like A) Students' Contribution B) Faculty Contribution C) Institute's Contribution and D) Scope for further improvements on **5 point scale** on the basis of Excellent 05, Very Good 04, Satisfactory 03, Neutral 02, Un satisfactory 01, and Not good 00.

The feedback questions are common for all department UG programs from SE to BE. Students were asked to submit the questioner in the MOODLE GNOMIO from feedback activity named as Course Exit Survey.

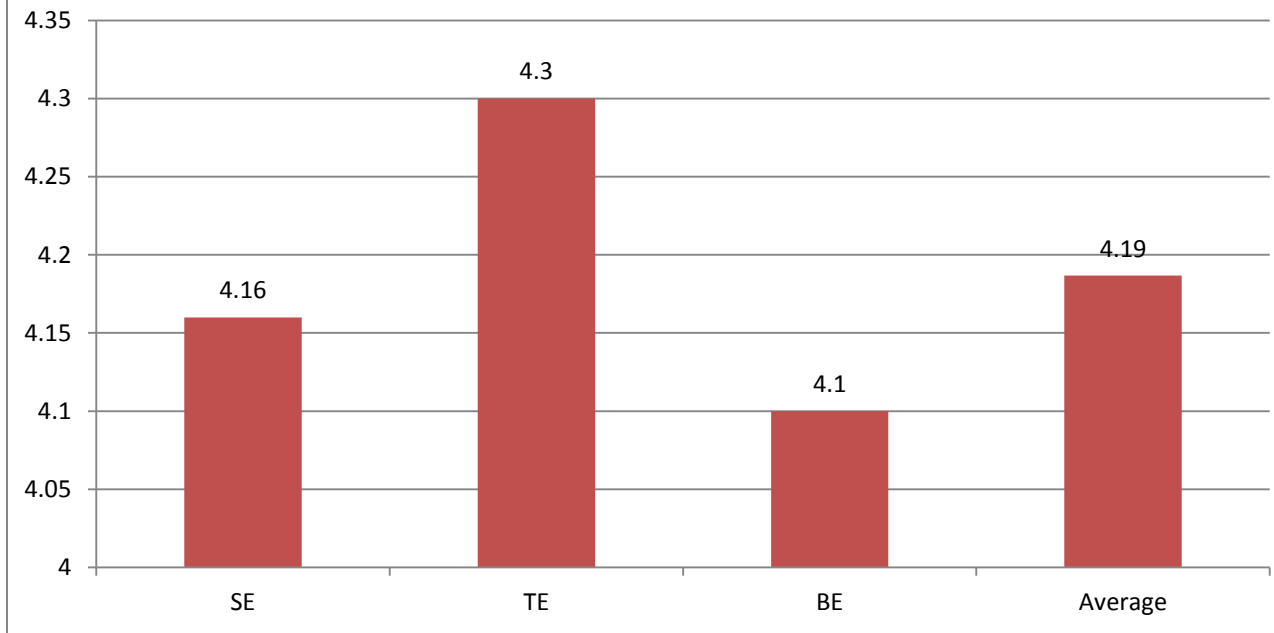

Total there are 34 questions where the students have submitted their feedback. 1743 (62 %) students have submitted the survey on GNOMIO.

Students from following Departments: Civil Engineering, Computer Engineering, Electronics and Telecommunication Engineering, Information Technology, Instrumentation and Control Engineering, Mechanical Engineering and Production Engineering have participated in the survey.

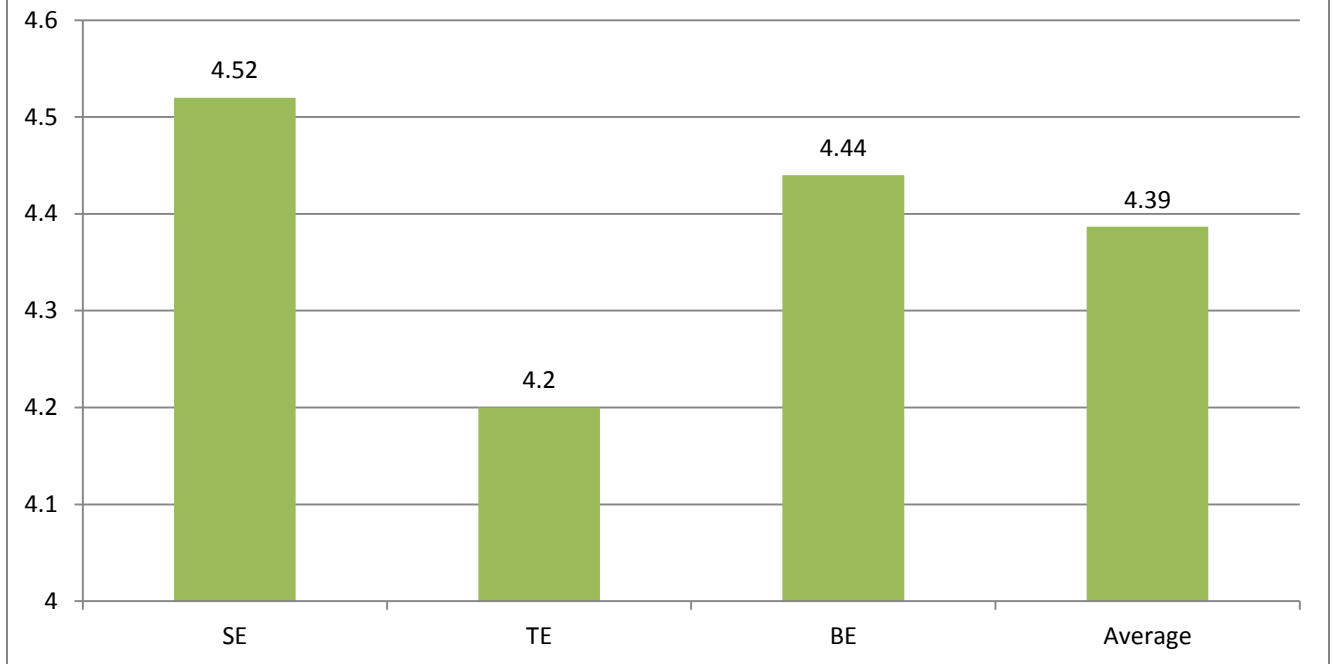

## Civil Engineering

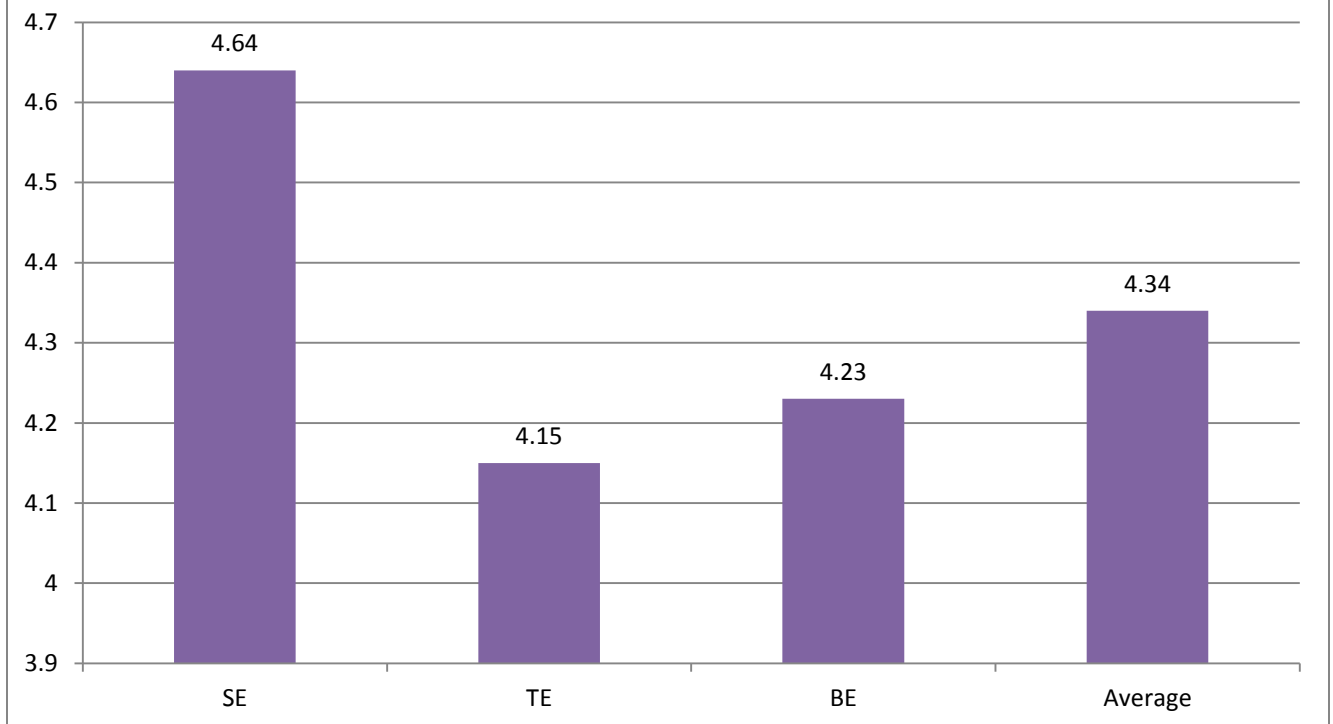

## Computer Engineering

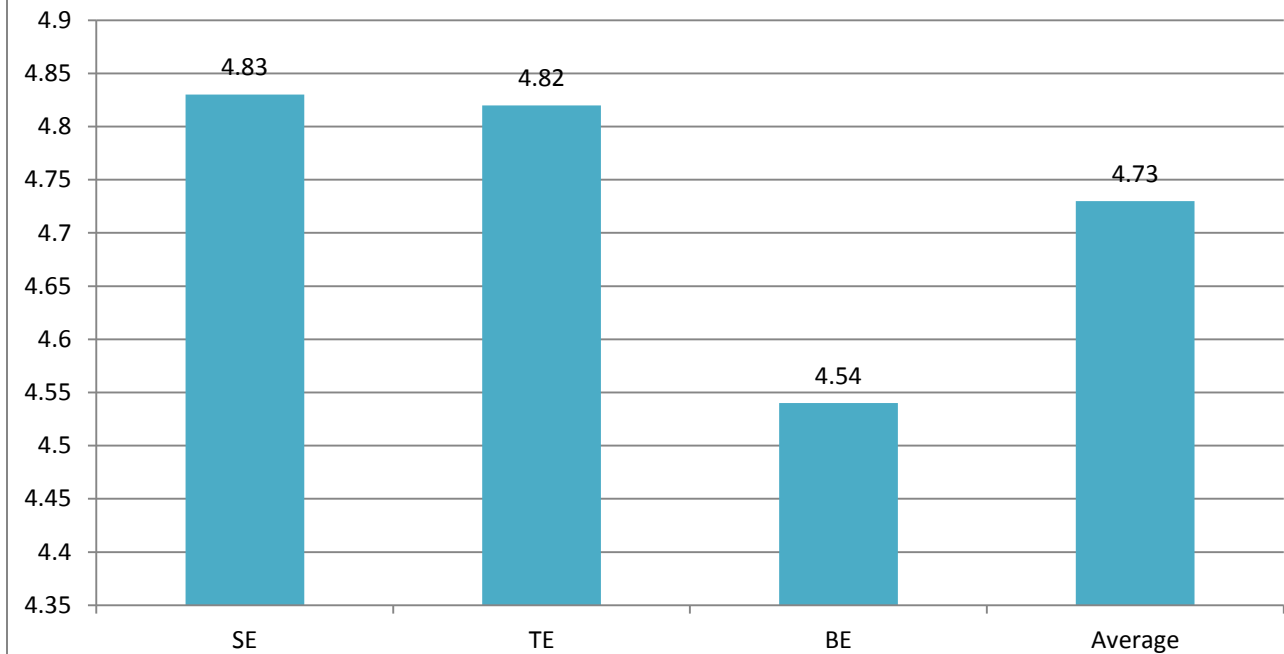

## Electronics and Telecommunication Engineering

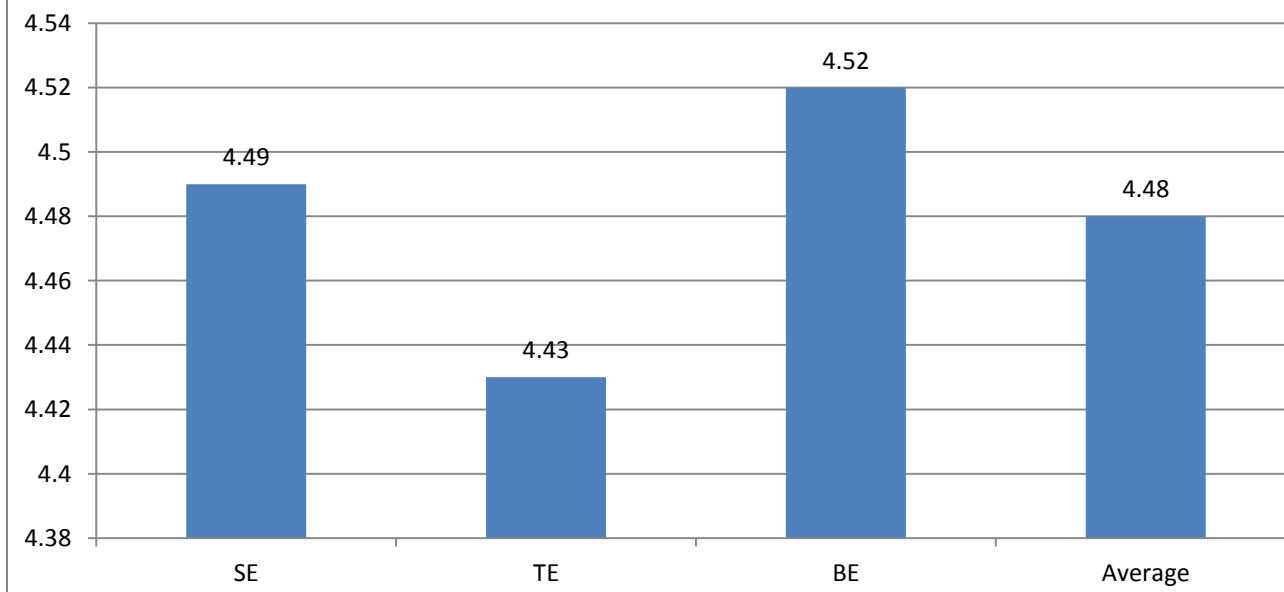

## Information Technology

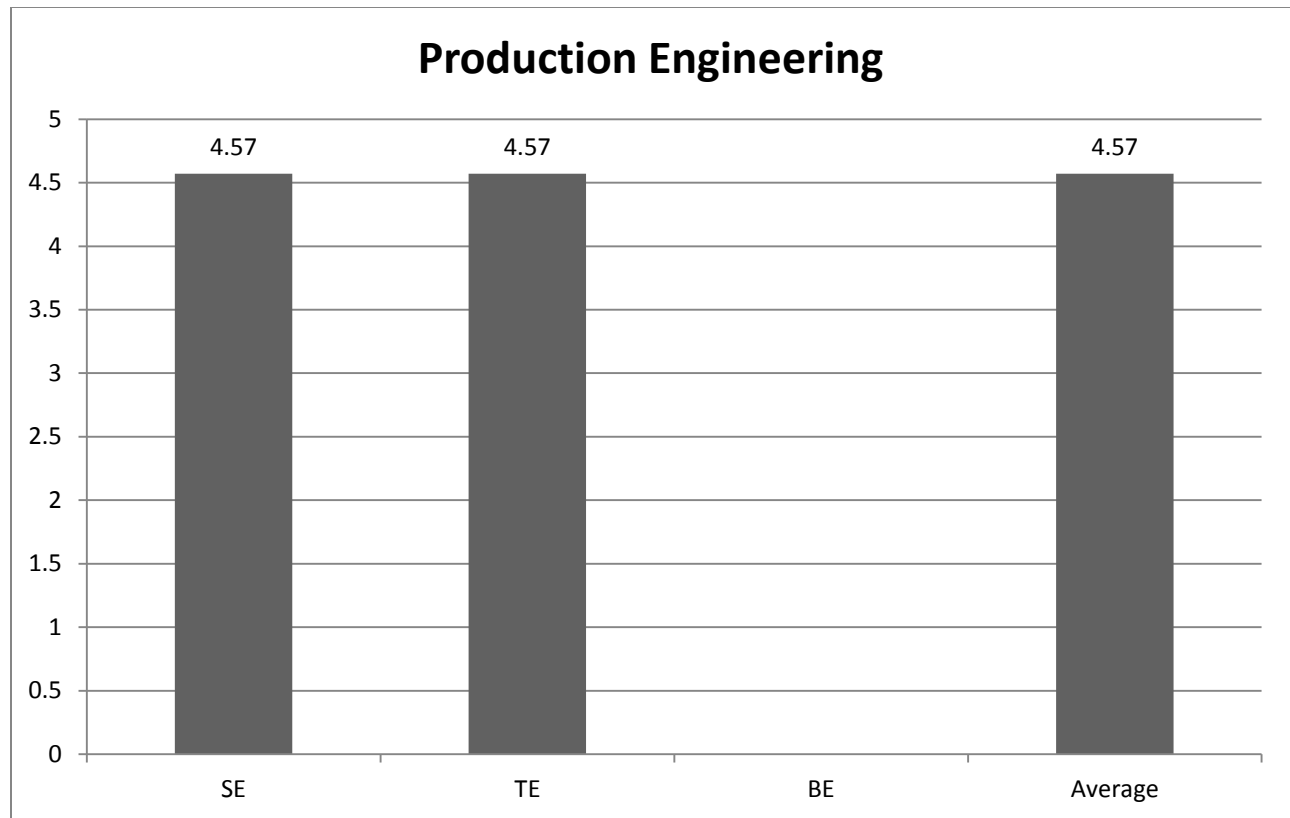

## Instrumentation and Control Engineering

## Mechanical Engineering

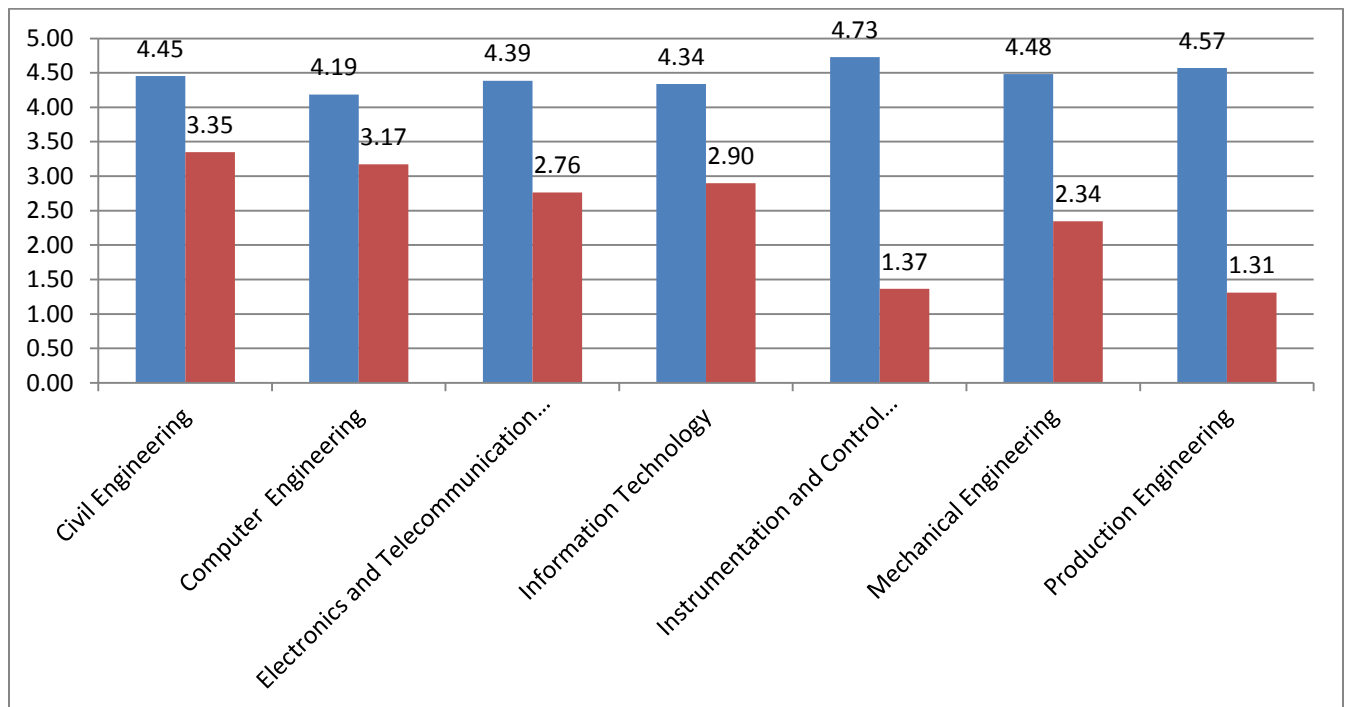

Above bar charts are shown for SSI of SE, TE and BE class with average out of 5 scale for all departments.

Students (% SE, TE, BE) from following Departments participated: Civil Engineering (91%, 86%, 49%), Computer Engineering (80%, 74%, 73%), Electronics and Telecommunication Engineering (69%, 75%, 46%), Information Technology (81%, 76%, 42%), Mechanical Engineering (61%, 51%, 45%), Instrumentation and Control Engineering (35%, 26%, 25%), Production Engineering (33%, 24%, -- ) have participated in the survey.

### Average SSI of the Departments

Blue bars indicate the Average Students Satisfaction Index (SSI) and Red bars indicate factored SSI and computed as:  $SSI \times (\text{Total Students Participated in Students' Exit Survey} / \text{Total Strength of Student in that Year})$ . Average SSI of the Institute is 4.45 (2.76) out of 5.
